

Baby Arizona

Baby Arizona is an AHCCCS program designed to help women receive the early prenatal care that is so important for a healthy pregnancy and a healthy baby. This program assists those mothers-to-be who need it most by helping them receive professional medical care in a timely manner at no cost while their AHCCCS eligibility is being assessed.

Maricopa Health Plan/University Family Care believes this program contains many features that are beneficial for our members and we encourage you to participate by becoming a Baby Arizona provider. The AMA (Arizona Medical Association) supports Baby Arizona and has developed a Participating Provider Agreement form which can be downloaded from www.babyarizona.gov.

After completing the Participating Provider Agreement, Baby Arizona will initiate training for your staff. This training must be completed prior to implementing the Baby Arizona program in your office. Additional staff may be trained at any time by completing the request form provided on the above website or by fax at 602-417-4162.

Once you are enrolled in Baby Arizona, you will be contacted by referred patients or through the Arizona Department of Health Services phone referral (ADHS Pregnancy and Breast Feeding hotline) to set up an office appointment for the patient. Your office will provide clinical services for the patient in this initial visit and assist in the S.O.B.R.A. eligibility process. For all information pertaining to becoming a Baby Arizona provider, please refer to the above website.

MHP/UFC encourages you to join this very worthwhile program which brings critical prenatal services to those who need them most.
